INVESTIGATIVE OPHTHALMOLOGY

Editors

Editor

BERNARD BECKER
Professor of Ophthalmology
Washington University School of Medicine
St. Louis, Missouri

Editorial Board

JAMES H. ALLEN
Professor of Ophthalmology
Tulane University School of Medicine
New Orleans, Louisiana

ELMER J. BALLINTINE
Assistant Clinical Professor of Ophthalmology
Western Reserve University School of Medicine
Cleveland, Ohio

GOODWIN M. BREININ
Professor of Ophthalmology
New York University School of Medicine
New York, New York

JOHN E. HARRIS
Professor of Ophthalmology
University of Minnesota
Minneapolis, Minnesota

MICHAEL J. HOGAN
Professor of Ophthalmology
University of California Medical School
San Francisco, California

JIN H. KINOSHITA
Assistant Professor of Biological Chemistry
Harvard Medical School
Boston, Massachusetts

V. EVERETT KINSEY
Assistant Director of Research, Kresge Eye Institute
Professor of Ophthalmic Chemistry, Wayne State University
Detroit, Michigan

PETER C. KRONFELD
Professor of Ophthalmology
University of Illinois College of Medicine
Chicago, Illinois

IRVING H. LEOPOLD
Director
Department of Ophthalmology, Mount Sinai Hospital
New York, New York

A. EDWARD MAUMENEE
Professor of Ophthalmology
Johns Hopkins University School of Medicine
Baltimore, Maryland

KENNETH N. OGLE
Professor of Physiologic Optics
Mayo Foundation, University of Minnesota
Rochester, Minnesota

ALBERT M. POTTS
Professor of Ophthalmology
University of Chicago School of Medicine
Chicago, Illinois

LUDWIG VON SALLMANN
Chief, Ophthalmology Branch
National Institute of Neurological Diseases and Blindness
Bethesda, Maryland

GEORGE K. SMELSER
Professor of Anatomy
Columbia University College of Physicians & Surgeons
New York, New York

KENNETH C. SWAN
Professor of Ophthalmology
University of Oregon School of Medicine
Portland, Oregon

LORENZ E. ZIMMERMAN
Chief, Ophthalmic Pathology Branch
Armed Forces Institute of Pathology
Washington 25, D. C.

Subject index*

A

Abstracts of papers presented at sectional meetings of Association for Research in Ophthalmology, 235, 942

Acetazolamide, effect on aqueous humor turnover rates in cat (Macri, Dixon, and Rall), 927

N-Acetylglucosamine-1-^{14}C, glucose-1-^{14}C, galactose-1-^{14}C, and sulfate-^{35}S, incorporation into calf and beef corneal glycosaminoglycans (Dohlman, Wortman, and Hultman), 867

Acid, amino, transport in lens (Kinsey), 691
in lens in relation to sugar cataracts (Reddy), 700

Activation, dual cation, of bovine lens autolysis (Anderson), 181

Adenosinetriphosphatase, Na-K activated, and active cation transport in lens (Bonting), 723

Adrenergic mediators (Nickerson), 1085

Age and phosphorylated intermediates in energy metabolism, enzyme activities in relationship to (Hockwin), 496

Aging and experimental cataractogenesis, metabolism of lens as related to (Lerman and Zigman), 643
energy metabolism in lens during (Sippel), 502

Albino rabbits, ciliary epithelium of, localization and other aspects of histochemistry of nucleoside phosphatases in (Shiose and Sears), 64

Albuminoid, glycoproteins and glycolipoproteins of bovine lens and relation to (Dische), 759

Amino acid transport in lens (Kinsey), 691
in lens in relation to sugar cataracts (Reddy), 700

Announcements, 139, 246, 372, 968, 1152

Anterior segment of eye, surgery of (Barraquer, Troutman, and Rutllán) (B. rev.), 962

Antibody technique, fluorescein-labeled, experimental study of herpes simplex uveitis with (Pettit et al.), 349

Aqueous humor drainage mechanism in cynomolgus monkey *(Macaca irus)* with evidence for unconventional routes (Bill), 911
production and drainage, in cynomolgus monkey *(Macaca irus)* (Bill and Hellsing), 920
turnover rates in cat, effect of acetazolamide on (Macri, Dixon, and Rall), 927

Artery, central retinal, interruption, light-induced DC responses of monkey retina before and after (Couras and Carr), 310

Association for Research in Ophthalmology:
Abstracts of papers presented at Sectional Meetings of, 235, 942
Proctor Medal of, presentation to Zacharias Dische (Smelser), 746
Program for November National Meeting, 964

ATPase, Na-K activated, and active cation transport in lens (Bonting), 723

Autoimmune reactions in lens, biological aspects of (Halbert and Manski), 516

Autolysis, bovine lens, dual cation activation (Anderson), 181

Autonomic drugs in familial dysautonomia, ocular responses to (Smith, Dancis, and Breinin), 358

Autoradiographic study of penetration of subconjunctivally injected hydrocortisone into normal and inflamed rabbit eye (McCartney et al.), 297

B

Biochemical and epidemiological studies of cataract and diabetes (Pirie), 629

Biological aspects of autoimmune reactions in lens (Halbert and Manski), 516

Blood flow, choroidal, quantitative studies by reflective densitometry (Trokel), 1129
diversion of, and end arteries, concept of (Hyman), 1000
pulsatile, physics of, with particular reference to small vessels (Attinger), 973
retinal, in animals, estimation of (Friedman and Smith), 1122
mast cells, and lymphatic capillaries of human corneal limbus, electron microscope studies on (Iwamoto and Smelser), 815
tissue exchange, permeability aspects of (Zweifach), 1065
vessels, small, transport of colloidal particles from, correlated with cyclic changes in permeability (Pappas and Blanchette), 1026
walls, transport of materials across, role of pinocytic vesicles in (Marchesi), 1111

Book reviews, 138, 962

Bovine lens autolysis, dual cation activation (Anderson), 181

C

Calcium, effect on rat lens permeability (Thoft and Kinoshita), 122

*February, pp. 1–140; April, pp. 141–248; June, pp. 249–372; August, pp. 373–744; October, pp. 745–968; December, pp. 969-1168.

Capillaries, lymphatic, mast cells and blood and, of human corneal limbus, electron microscope studies on (Iwamoto and Smelser), 815

retinal, and choriocapillaris, fine structure of (Bernstein and Hollenberg), 1016

Capillary endothelial cells, retinal, dog, crystallike bodies in (Bloodworth and Molitor), 285

Capsule, epithelium and, in transport, relative role (Kinsey and Reddy), 104

lens, and zonular fibers (Ashton et al.), 141

electron microscopic study of pseudo-exfoliation. I. Lens capsule and zonular fibers (Ashton et al.), 141

II. Iris and ciliary body (Shakib, Ashton, and Blach), 154

rabbit lens, at different ages, collagenous protein of, content and structural characteristics (Dische and Zelmenis), 174

Carbohydrates of lens in normal and precataractous states (Kuck), 638

Cataract and diabetes, epidemiological and biochemical studies of (Pirie), 629

development, lens assays on diabetic and galactosemic rats receiving diets that modify (Patterson et al.), 98

galactose, topical corticosteroids and (Cotlier and Becker), 806

historical perspective (Rucker), 377

in galactosemia, Jonas S. Friedenwald Memorial Lecture (Kinoshita), 786

mature sugar, changes associated with appearance (Patterson and Bunting), 167

new concepts of human lenticular lipids and their possible role in (Feldman and Feldman), 162

sugar, amino acid transport in lens in relation to (Reddy), 700

metabolism and, discussion on, 661

Cataractogenesis, experimental, aging and, metabolism of lens as related to (Lerman and Zigman), 643

Catecholamines, metabolism of (Hanna), 1095

Cation activation, dual, of bovine lens autolysis (Anderson), 181

transport, active, in lens, Na-K activated adenosinetriphosphatase and (Bonting), 723

of lens (Harris and Becker), 709

Cells, dendritic, in human corneal epithelium, electron microscopy of (Segawa), 264

dog retinal capillary endothelial, crystallike bodies in (Bloodworth and Molitor), 285

epithelium, retinal pigment, metabolism. II. Respiration and glycolysis (Glocklin and Potts), 226

mast, and blood and lymphatic capillaries of human corneal limbus, electron microscope studies on (Iwamoto and Smelser), 815

disruption and other changes in pericorneal tissue morphology after intraperitoneal injections of potent histamine liberator (compound 48/80) (Garden), 835

turnover, discussion on, 492

Cellular proliferation in lens (Srinivasan and Harding), 452

Central retinal artery interruption, light-induced DC responses of monkey retina before and after (Gouras and Carr), 310

Cercopithecus aethiops and *Macaca irus*, effect on refraction of intramuscular pilocarpine in two species of monkey (Törnqvist), 211

Cholinesterase staining, electron microscopy and, demonstration of different types of muscle fibers in human extraocular muscle by (Dietert), 51

Choriocapillaris and retinal capillaries, fine structure of (Bernstein and (Hollenberg), 1016

Choroidal blood flow, quantitative studies by reflective densitometry (Trokel), 1129

Ciliary body, detachment of, anatomical and physical considerations (Moses), 935

iris and (Shakib, Ashton, and Blach), 154

epithelium of albino rabbits, histochemistry of nucleoside phosphatases in, localization and other aspects (Shiose and Sears), 64

processes of rabbit eye, effect of composition of medium and of metabolic inhibitors on secretion in vitro by (Berggren), 83

of rabbit eye, effect of parasympathomimetic and sympathomimetic drugs on secretion in vitro by (Berggren), 91

Circulation time, mean retinal, photographic method for measuring, using fluorescein (Hickam and Frayser), 876

Collagenous protein of rabbit lens capsules at different ages, content and structural characteristics (Dische and Zelmenis), 174

Colloidal particles, transport of, from small blood vessels, correlated with cyclic changes in permeability (Pappas and Blanchette), 1026

Composition of medium and of metabolic inhibitors on secretion in vitro by ciliary processes of rabbit eye, effect (Berggren), 83

Compound 48/80, potent histamine liberator, mast cell disruption and other changes in pericorneal tissue morphology after intraperitoneal injections of (Garden), 835

Cone activity in light-induced DC response of monkey retina (Gouras and Carr), 318

Connective tissue cells, corneal, development of enzyme activities in, during lag phase of wound repair (Weimar and Haraguchi), 853

Cornea, hydration of, effect of ouabain on (Brown and Hedbys), 216
rabbit, effects of ouabain on pinocytosis and stromal thickness in (Kaye and Donn), 844
Corneal connective tissue cells, development of enzyme activities in, during lag phase of wound repair (Weimar and Haraguchi), 853
endothelium, human, electron microscopy of, with reference to transport mechanisms (Iwamoto and Smelser), 270
epithelium, dogfish, study of DNA (Zigman, Munro, and Lerman), 222
human, electron microscopy of dendritic cells in (Segawa), 264
glycosaminoglycans, incorporation of sulfate- ^{35}S, N-acetylglucosamine-1- ^{14}C, glucose-1-^{14}C, and galactose-1-^{14}C into (Dohlman, Wortman, and Hultman), 867
herpes simplex, dissemination (Maloney and Kaufman), 872
limbus, human, electron microscope studies on mast cells and blood and lymphatic capillaries of (Iwamoto and Smelser), 815
Corneas of rainbow trout, in vitro ion and water movement in (Edelhauser, Hoffert, and Fromm), 290
Cortical response, visual evoked, in cat (Jacobson, Masuda, and Jacobson), 330
Corticosteroids, effect on resorption of partial hyphema in rabbit eyes (Podos, Fingerman, and Becker), 76
topical, and galactose cataracts (Cotlier and Becker), 806
intraocular pressure response to (Becker), 198
Crystallike bodies in dog retinal capillary endothelial cells (Bloodworth and Molitor), 285
Crystalline lactic dehydrogenase of lens (Fowlks), 611
lens, regeneration of (Stone), 420
studies on (Kinsey and Reddy), 104
Cynomolgus monkey (*Macaca irus*) aqueous humor drainage mechanism in, with evidence for unconventional routes (Bill), 911
production and drainage of aqueous humor in (Bill and Hellsing), 920
Cytological basis of protein leakage into eye following paracentesis (Smelser and Pei), 249
studies on lens epithelium (von Sallmann), 471

D

DC responses, light-induced, of monkey retina before and after central retinal artery interruption (Gouras and Carr), 310
of monkey retina, cone activity in (Gouras and Carr), 318
Dehydrogenase, lactate, in chick lens, ontogeny of (Maisel, Kerrigan, and Syner), 362
lactic, crystalline, of lens (Fowlks), 611
Dendritic cells, in human corneal epithelium, electron microscopy of (Segawa), 264
Densitometry, reflective, quantitative studies of choroidal blood flow by (Trokel), 1129
Detachment, experimental retinal, with sulfated polysaccharide (Landholm and Watzke), 42
Diabetes, cataract and, epidemiological and biochemical studies of (Pirie), 629
Diabetic and galactosemic rats receiving diets that modify cataract development, lens assays on (Patterson et al.), 98
retinopathy, human and canine, ultrastructural aspects of (Bloodworth and Molitor), 1037
Diets that modify cataract development, lens assays on diabetic and galactosemic rats receiving (Patterson et al.), 98
Dische, Zacharias, presentation of Proctor Medal of Association for Research in Ophthalmology to (Smelser), 746
publications of, 753
DNA of dogfish corneal epithelium, study (Zigman, Munro, and Lerman), 222
RNA, and protein synthesis in developing lens, changes in (Hanna), 480
Dogfish corneal epithelium, study of DNA (Zigman, Munro, and Lerman), 222
Drugs, autonomic, in familial dysautonomia, ocular responses to (Smith, Dancis, and Breinin), 358
parasympathomimetic and sympathomimetic, effect on secretion in vitro by ciliary processes of rabbit eye (Berggren), 91
Dysautonomia, familial, ocular responses to autonomic drugs in (Smith, Dancis, and Breinin), 358

E

Electron microscope studies on mast cells and blood and lymphatic capillaries of human corneal limbus (Iwamoto and Smelser), 815
microscopic study of pseudo-exfoliation of lens capsule. I. Lens capsule and zonular fibers (Ashton et al.), 141
II. Iris and ciliary body (Shakib, Ashton, and Blach), 154
microscopy and cholinesterase staining, demonstration of different types of muscle fibers in human intraocular muscle by (Dietert), 51
of dendritic cells in human corneal epithelium (Segawa), 264
of human corneal endothelium with reference to transport mechanisms (Iwamoto and Smelser), 270

Electron microscopy—Cont'd
of normal human lens (Cohen), 433
Electro-oculographic recording, accuracy and precision of (North), 343
Embryology and morphology of lens (Smelser), 398
experimental, of vertebrate eye (Coulombre), 411
Embryonic development of different vertebrates, lens proteins during (Rabaey), 560
End arteries and diversion of blood flow, concept of (Hyman), 1000
Endothelial cells, dog retinal capillary, crystallike bodies in (Bloodworth and Molitor), 285
Endothelium, human corneal, electron microscopy of, with reference to transport mechanisms (Iwamoto and Smelser), 270
Energy metabolism, discussion on, 514
enzyme activities in relationship to age and phosphorylated intermediate in (Hockwin), 496
in lens during aging (Sippel), 502
Enzyme activities in corneal connective tissue cells, development during lag phase of wound repair (Weimar and Haraguchi), 853
in relationship to age and phosphorylated intermediates in energy metabolism (Hockwin), 496
Epidemiological and biochemical studies of cataract and diabetes (Pirie), 629
Epithelium and capsule in transport, relative role (Kinsey and Reddy), 104
ciliary of albino rabbits, localization and other aspects of histochemistry of nucleoside phosphatases in (Shiose and Sears), 64
corneal, electron microscopy of dendritic cells in (Segawa), 264
dogfish, corneal, study of DNA (Zigman, Munro, and Lerman), 222
lens, cytologic studies on (von Sallmann), 471
Epithelium—Cont'd
retinal pigment cell, metabolism. II. Respiration and glycolysis (Glocklin and Potts), 226
Extraocular muscle, human, demonstration of different types of muscle fibers in, by electron microscopy and cholinesterase staining (Dietert), 51
Eye, clinically normal, statistical attributes of steroid hypertensive response in. I. Demonstration of three levels of response (Armaly), 187
protein leakage into, following paracentesis, cytological basis (Smelser and Pei), 249
rabbit, ciliary processes of, effect of composition of medium and of metabolic inhibitors on secretion in vitro by (Berggren), 83
ciliary processes of, effect of parasympathomimetic and sympathomimetic drugs on secretion in vitro by (Berggren), 91
normal and sympathectomized, effect of death on outflow resistance in (Bárány and Gassmann), 206
partial hyphema in, effect of corticosteroids on resorption (Podos, Fingerman, and Becker), 76
vertebrate, experimental embryology of (Coulombre), 411

F

Familial dysautonomia, ocular responses to autonomic drugs in (Smith, Dancis, and Breinin), 358
Fibers, muscle, demonstration of different types of human extraocular muscle by electron microscopy and cholinesterase staining (Dietert), 51
retractor bulbi, cat, in vivo microelectrode studies of (Bach-y-Rita and Ito), 338
slow and twitch, in superior rectus muscle of rabbit, comparative pharmacologic-histologic study (Kern), 901
Fibers—Cont'd
zonular, lens capsule and (Ashton et al.), 141
Fluorescein, photographic method for measuring mean retinal circulation time using (Hickam and Frayser), 876
Fluorescein-labeled antibody technique, experimental study of herpes simplex uveitis with (Pettit et al.), 349
Foveal function, use of 0.06 degree red target for evaluation of (Potts and Nagaya), 303
Freezing, transscleral, of retina, experimental study (Archambeau and Henderson), 885
Friedenwald Memorial Award in Ophthalmology:
Introduction of Dr. Lorenz E. Zimmerman on occasion (Hogan), 2
Presentation to Dr. Kinoshita (Cogan), 780
Remarks on acceptance (Kinoshita), 782
on acceptance (Zimmerman), 4
Fundus of eye, intertissue vascular relationships in (Michaelson), 1004

G

Galactose cataracts, topical corticosteroids and (Cotlier and Becker), 806
Galactose-1-^{14}C, sulfate-^{35}S, N-acetylglucosamine-1-^{14}C, glucose-1-^{14}C, and, incorporation into calf and beef corneal glycosaminoglycans (Dohlman, Wortman, and Hultman), 867
Galactosemia, cataracts in (Kinoshita), 786
Galactosemic rats, lens assays on diabetic and, receiving diets that modify cataract development (Patterson et al.), 98
Glucose metabolism in lens, pathways of (Kinoshita), 619
transport in lens, review of (Patterson), 667

Glucose-1-^{14}C, galactose-1-^{14}C, sulfate-^{35}S, and N-acetylglucosamine-1-^{14}C, incorporation into calf and beef corneal glucosaminoglycans (Dohlman, Wortman, and Hultman), 867
Glycolipoproteins, glycoproteins and, of bovine lens, and relation to albuminoid (Dische), 759
Glycolysis, respiration and (Glocklin and Potts), 226
Glycoproteins and glycolipoproteins of bovine lens and relation to albuminoid (Dische), 759
of lens (Dische), 592
Glycosaminoglycans, corneal, incorporation of sulfate-^{35}S, N-acetylglucosamine-1-^{14}C, glucose-1-^{14}C, and galactose-1-^{14}C, into (Dohlman, Wortman, and Hultman), 867

H

Herpes simplex, corneal, dissemination (Maloney and Kaufman), 872
uveitis: experimental study with fluorescein-labeled antibody technique (Pettit et al.), 349
Histamine liberator, potent (compound 48/80), mast cell disruption and other changes in pericorneal tissue morphology after intraperitoneal injections of (Garden), 835
Histochemistry of nucleoside phosphatases in ciliary epithelium of albino rabbits, localization and other aspects (Shiose and Sears), 64
Historical perspective of cataract (Rucker), 377
Human extraocular muscle, demonstration of different types of muscle fibers in, by electron microscopy and cholinesterase staining (Dietert), 51
lens proteins, ontogeny and specificity (Maisel and Goodman), 129
lenticular lipids, new concepts of, and their possible role in cataracts (Feldman and Feldman), 162
Hydration of cornea, effect of ouabain on (Brown and Hedbys), 216
Hydrocortisone, subconjunctivally injected, penetration into normal and inflamed rabbit eye, autoradiographic study of (McCartney et al.), 297
Hyperbaric oxygenation, effect on microcirculation: use in therapy of retinal vascular disorders (Haddad and Leopold), 1141
Hypertensive response, steroid, in clinically normal eye, statistical attributes. I. Demonstration of three levels of response (Armaly), 187
Hyphema, partial, in rabbit eyes, effect of corticosteroids on resorption (Podos, Fingerman, and Becker), 76

I

Immunochemistry of lens with special reference to phylogeny (Manski and Halbert), 539
Inflamed rabbit eye, normal and, autoradiographic study of penetration of subconjunctivally injected hydrocortisone into (McCartney et al.), 297
Inhibitors, metabolic, effect of composition of medium and of, on secretion in vitro by ciliary processes of rabbit eye (Berggren), 83
Intermediates, phosphorylated, age and, in energy metabolism, enzyme activities in relationship to (Hockwin), 496
Interstitial spaces, pressure-volume relationships in (Guyton), 1075
Intraocular pressure response to topical corticosteroids (Becker), 198
Intraperitoneal injections of potent liberator (compound 48/80), mast cell disruption and other changes in pericorneal tissue morphology after (Garden), 835
Ion and water movement, in vitro, in corneas of rainbow trout (Edelhauser, Hoffert, and Fromm), 290
Iris and ciliary body (Shakib, Ashton, and Blach), 154

K

Kinoshita, Jin H., presentation of Friedenwald Award to (Cogan), 780
publications of, 784

L

Lactate dehydrogenase in chick lens, ontogeny of (Maisel, Kerrigan, and Syner), 362
Lactic dehydrogenase, crystalline, of lens (Fowlks), 611
Lag phase of wound repair, development of enzyme activities in corneal connective tissue cells during (Weimar and Haraguchi), 853
LDH in chick lens, ontogeny of (Maisel, Kerrigan, and Syner), 362
Leakage, protein, into eye following paracentesis, cytological basis of (Smelser and Pei), 249
Lens, amino acid transport in (Kinsey), 691
transport in, in relation to sugar cataracts (Reddy), 700
assays on diabetic and galactosemic rats receiving diets that modify cataract development (Patterson et al.), 98
autolysis, bovine, dual cation activation (Anderson), 181
biological aspects of autoimmune reactions in (Halbert and Manski), 516
bovine, glycoproteins and glycolipoproteins of, and relation to albuminoid (Dische), 759
capsule and zonular fibers (Ashton et al.), 141
electron microscopic study of pseudo-exfoliation. I. Lens capsule and zonular fibers (Ashton et al.), 141
II. Iris and ciliary body (Shakib, Ashton, and Blach), 154

Lens capsule—Cont'd
rabbit, at different ages, collagenous protein of, content and structural characteristics (Dische and Zelmenis), 174
cation transport of (Harris and Becker), 709
cellular proliferation in (Srinivasan and Harding), 452
chick, ontogeny of lactate dehydrogenase in (Maisel, Kerrigan, and Syner), 362
crystalline lactic dehydrogenase of (Fowlks), 611
regeneration of (Stone), 420
studies on (Kinsey and Reddy), 104
developing, changes in DNA, RNA, and protein synthesis in (Hanna), 480
embryology and morphology of (Smelser), 398
energy metabolism in, during aging (Sippel), 502
epithelium, cytologic studies on (von Sallmann), 471
glucose transport in, review of (Patterson), 667
glycoproteins of (Dische), 592
immunochemistry of, with special reference to phylogeny (Manski and Halbert), 539
in normal and precataractous states, carbohydrates of (Kuck), 638
metabolism of, as related to aging and experimental cataractogenesis (Lerman and Zigman), 643
Na-K activated adenosinetriphosphatase and active cation transport in (Bonting), 723
normal human, electron microscopy of (Cohen), 433
pathways of glucose metabolism in (Kinoshita), 619
permeability, rat, effect of calcium on (Thoft and Kinoshita), 122
present state and perspectives in research of (Nordmann), 384
proteins, discussion on, 607
during embryonic development of different vertebrates (Rabaey), 560
human, ontogeny and specificity (Maisel and Goodman), 129
Lens—Cont'd
rabbit, efflux of ^{86}rubidium from (Becker and Cotlier), 117
rate of potassium exchange of (Thoft and Kinoshita), 800
soluble proteins of (Spector), 579
symposium on, 377
transport of sugars into (Kern), 680
Lenticular lipids, human, new concepts of, and their possible role in cataracts (Feldman and Feldman), 162
Light-induced DC response of monkey retina, cone activity in (Gouras and Carr), 318
of monkey retina before and after central retinal artery interruption (Gouras and Carr), 310
Limbus, corneal, human, electron microscope studies on mast cells and blood and lymphatic capillaries of (Iwamoto and Smelser), 815
Lipids, human, lenticular, new concept of, and their possible role in cataracts (Feldman and Feldman), 162
Localization and other aspects of histochemistry of nucleoside phosphatases in ciliary epithelium of albino rabbits (Shiose and Sears), 64
Lymphatic capillaries, mast cells and blood and, of human corneal limbus, electron microscope studies on (Iwamoto and Smelser), 815

M

Macaca irus, aqueous humor drainage mechanism in with evidence for unconventional routes (Bill), 911
Cercopithecus aethiops and, effect on refraction of intramuscular pilocarpine in two species of monkey (Törnqvist), 211
production and drainage of aqueous humor in (Bill and Hellsing), 920
Masson's ammoniated silver nitrate stain, modified, dendritic cells in human corneal epithelium studied by electron microscopy with (Segawa), 264
Mast cells and blood and lymphatic capillaries of human corneal limbus, electron microscope studies on (Iwamoto and Smelser), 815
disruption and other changes in pericorneal tissue morphology after intraperitoneal injections of potent histamine liberator (compound 48/80) (Garden), 835
Medium, effect of composition of, and of metabolic inhibitors on secretion in vitro by ciliary processes of rabbit eye (Berggren), 83
Melanocytes, melanocytic nevi, and melanocytomas (Zimmerman), 11
Metabolic inhibitors, effect of composition of medium and of, on secretion in vitro by ciliary processes of rabbit eye (Berggren), 83
Metabolism, energy, discussion on, 514
enzyme activities in relationship to age and phosphorylated intermediates in (Hockwin), 496
in lens during aging (Sippel), 502
glucose, in lens, pathways of (Kinoshita), 619
of lens as related to aging and experimental cataractogenesis (Lerman and Zigman), 643
of retinal pigment cell epithelium. II. Respiration and glycolysis (Glocklin and Potts), 226
sugar, and cataracts, discussion on, 661
Microcirculation, effect of hyperbaric oxygenation on: use in therapy of retinal vascular disorders (Haddad and Leopold), 1141
functional geometry of, and vascular injection method (Sobin), 1105

Microelectrode studies, in vivo, of cat retractor bulbi fibers (Bach-y-Rita and Ito), 338

Microscopic study, electron, of pseudo-exfoliation of lens capsule. I. Lens capsule zonular fibers (Ashton et al.), 141

II. Iris and ciliary body (Shakib, Ashton, and Blach), 154

Monkey, two species (*Cercopithecus aethiops* and *Macaca irus*), effect on refraction of intramuscular pilocarpine in (Törnqvist), 211

Morphology, discussion on, 447

embryology and, of lens (Smelser), 398

Mucopolysaccharides, synthesis by retina, utilization of ^{35}S-sulfate in (Hall, Ocumpaugh, and Young), 322

Muscle fibers, demonstration of different types in human extraocular muscle by electron microscopy and cholinesterase staining (Dietert), 51

extraocular, human, demonstration of different types of muscle fibers in, by electron microscopy and cholinesterase staining (Dietert), 51

rectus, superior, in rabbit, slow and twitch fibers in, comparative pharmacologic-histologic study (Kern), 901

Myleran, TEM, and x-rays, comparison of effects on lens epithelium (von Sallmann), 471

N

Na-K activated adenosinetriphosphatase and active cation transport in lens (Bonting), 723

Nevi, melanocytic, melanocytes, and melanocytomas (Zimmerman), 11

Nucleoside phosphatases, histochemistry, in ciliary epithelium of albino rabbits, localization and other aspects (Shiose and Sears), 64

5-Nucleotidase and succinic dehydrogenase, development of enzyme activities in corneal connective tissue cells during lag phase of wound repair (Weimar and Haraguchi), 853

O

Observation distance, stereoscopic acuity and (Brown, Ogle, and Reiher), 894

Ocular responses to autonomic drugs in familial dysautonomia (Smith, Dancis, and Breinin), 358

Ontogeny and specificity of human lens proteins (Maisel and Goodman), 129

of lactate dehydrogenase in chick lens (Maisel, Kerrigan, and Syner), 362

Ophthalmology, introduction to (Jaensch and Hollwich) (B. rev.), 138

Ouabain, effect on hydration of cornea (Brown and Hedbys), 216

pinocytosis and stromal thickness in rabbit cornea (Kaye and Donn), 844

Outflow resistance in normal and sympathectomized rabbit eyes, effect of death on (Bárány and Gassmann), 206

Oxygen, effect on immature retinal vessels (Patz), 988

Oxygenation, hyperbaric, effect on microcirculation: use in therapy of retinal vascular disorders (Haddad and Leopold), 1141

P

Paracentesis, cytological basis of protein leakage into eye following (Smelser and Pei), 249

Parasympathomimetic and sympathomimetic drugs, effect on secretion in vitro by ciliary processes of rabbit eye (Berggren), 91

Pathology, textbook of (Fallis) (B. rev.), 962

Pericorneal tissue morphology, mast cell disruption and other changes in, after intraperitoneal injections of potent histamine liberator (compound 48/80) (Garden), 835

Permeability aspects of blood tissue exchange (Zweifach), 1065

cyclic changes in, correlated with transport of colloidal particles from small blood vessels (Pappas and Blanchette), 1026

Phosphatases, nucleoside, histochemistry, in ciliary epithelium of albino rabbits, localization and other aspects (Shiose and Sears), 64

Phosphorylated intermediates, age and, in energy metabolism, enzyme activities in relationship to (Hockwin), 496

Photographic method for measuring mean retinal circulation time using fluorescein (Hickam and Frayser), 876

Phylogeny, immunochemistry of lens with special reference to (Manski and Halbert), 539

Pigment cell epithelium, retinal, metabolism. II. Respiration and glycolysis (Glocklin and Potts), 226

Pilocarpine, intramuscular, effect on refraction of, in two species of monkey (*Cercopithecus aethiops* and *Macaca irus*) (Törnqvist), 211

Pinocytic vesicles, role in transport of materials across walls of small blood vessels (Marchesi), 1111

Pinocytosis and stromal thickness in rabbit cornea, effects of ouabain on (Kaye and Donn), 844

Polysaccharide, sulfated, experimental retinal detachment with (Landholm and Watzke), 42

Potassium exchange of lens, rate of (Thoft and Kinoshita), 800

Precataractous states, normal and, carbohydrates of lens in (Kuck), 638

Pressure response, intraocular, to topical corticosteroids (Becker), 198

Proctor Medal of Association for Research in Ophthalmology:

Proctor Medal—Cont'd
Presentation to Zacharias Dische (Smelser), 746
Remarks made on acceptance of (Dische), 749
Proliferation, cellular, in lens (Srinivasan and Harding), 452
Protein, collagenous, of rabbit lens capsules at different ages, content and structural characteristics (Dische and Zelmenis), 174
DNA, and RNA synthesis in developing lens, changes in (Hanna), 480
human lens, ontogeny and specificity (Maisel and Goodman), 129
leakage into eye following paracentesis, cytological basis of (Smelser and Pei), 249
lens, discussion on, 607
during embryonic development of different vertebrates (Rabaey), 560
methods for separation of (Potts), 531
soluble, of lens (Spector), 579
Pseudo-exfoliation of lens capsule, electron microscopic study. I. Lens capsule and zonular fibers (Ashton et al.), 141
II. Iris and ciliary body (Shakib, Ashton, and Blach), 154

R

Rabbit, albino, ciliary epithelium of, localization and other aspects of histochemistry of nucleoside phosphatases in (Shiose and Sears), 64
eye, ciliary processes of, effect of composition of medium and of metabolic inhibitors on secretion in vitro by (Berggren), 83
ciliary processes of, effect of parasympathomimetic and sympathomimetic drugs on secretion in vitro by (Berggren), 91
normal and sympathectomized, effect of death on outflow resistance in (Bárány and Gassmann), 206
Rabbit eye—Cont'd
partial hyphema in, effect of corticosteroids on resorption (Podos, Fingerman, and Becker), 76
lens capsules at different ages, collagenous protein of, content and structural characteristics (Dische and Zelmenis), 174
efflux of ^{86}rubidium from (Becker and Cotlier), 117
Rainbow trout, in vitro ion and water movement in corneas of (Edelhauser, Hoffert, and Fromm), 290
Rats, diabetic and galactosemic, receiving diets that modify cataract development, lens assays on (Patterson et al.), 98
lens permeability, effect of calcium on (Thoft and Kinoshita), 122
Rectus muscle, superior, of rabbit, slow and twitch fibers in, comparative pharmacologic-histologic study (Kern), 901
Red target, 0.06 degree, use for evaluation of foveal function (Potts and Nagaya), 303
Refraction, effect on, of intramuscular pilocarpine in two species of monkey (*Cercopithecus aethiops* and *Macaca irus*) (Törnqvist), 211
Regeneration of crystalline lens (Stone), 420
Research of lens, present state and perspectives (Nordmann), 384
Resorption of partial hyphema in rabbit eyes, effect of corticosteroids on (Podos, Fingerman, and Becker), 76
Respiration and glycolysis (Glocklin and Potts), 226
Retina, monkey, cone activity in light-induced DC response of (Gouras and Carr), 318
light-induced DC responses of, before and after central retinal artery interruption (Gouras and Carr), 310
transscleral freezing of, experimental study (Archambeau and Henderson), 885
Retina—Cont'd
utilization of ^{35}S-sulfate in synthesis of mucopolysaccharide by (Hall, Ocumpaugh, and Young), 322
Retinal artery, central, interruption, light-induced DC responses of monkey retina before and after (Gouras and Carr), 310
blood flow in animals, estimation of (Friedman and Smith), 1122
capillaries and choriocapillaris, fine structure of (Bernstein and Hollenberg), 1016
capillary endothelial cells, dog, crystallike bodies in (Bloodworth and Molitor), 285
circulation time, mean, using fluorescein, photographic method for measuring (Hickam and Frayser), 876
detachment, experimental, with sulfated polysaccharide (Landholm and Watzke), 42
vascular disorders, therapy of: effect of hyperbaric oxygenation on microcirculation (Haddad and Leopold), 1141
patterns, acellular change (Kuwabara and Cogan), 1049
vessels, immature, effect of oxygen on (Patz), 988
Retinopathy, diabetic, human and canine, ultrastructural aspects of (Bloodworth and Molitor), 1037
Retractor bulbi fibers, cat, in vivo microelectrode studies of (Bach-y-Rita and Ito), 338
RNA, DNA, and protein synthesis in developing lens, changes in (Hanna), 480
^{86}Rubidium, efflux from rabbit lens (Becker and Cotlier), 117

S

Secretion in vitro by ciliary processes of rabbit eye, effect of composition of medium and of metabolic inhibitors on (Berggren), 83

Secretion in vitro—Cont'd
by ciliary processes of rabbit eye, effect of parasympathomimetic and sympathomimetic drugs on (Berggren), 91
Separation of proteins, methods for (Potts), 531
Slow and twitch fibers in superior rectus muscle of rabbit, comparative pharmacologic-histologic study (Kern), 901
Soluble proteins of lens (Spector), 579
Specificity, ontogeny and, of human lens protein (Maisel and Goodman), 129
^{35}S-sulfate, utilization in synthesis of mucopolysaccharides by retina (Hall, Ocumpaugh, and Young), 322
Stereoscopic acuity and observation distance (Brown, Ogle, and Reiher), 894
Steroid hypertensive response in clinically normal eye, statistical attributes. I. Demonstration of three levels of response (Armaly), 187
Stromal thickness, pinocytosis and, in rabbit cornea, effects of ouabain on (Kaye and Donn), 844
Structural characteristics, content and, of collagenous protein of rabbit lens capsules at different ages (Dische and Zelmenis), 174
Subconjunctivally injected hydrocortisone, autoradiographic study of penetration into normal and inflamed rabbit eye (McCartney et al.), 297
Succinic dehydrogenase, 5-nucleotidase and, development of enzyme activities in corneal connective tissue cells during lag phase of wound repair (Weimar and Haraguchi), 853
Sugar cataracts, amino acid transport in lens in relation to (Reddy), 700
mature, changes associated with appearance (Patterson and Bunting), 167
metabolism and cataracts, discussion on, 661
transport into lens (Kern), 680
Sulfate-^{35}S, N-acetylglucosamine-1-^{14}C, glucose-1-^{14}C, and galactose-1-^{14}C, incorporation into calf and beef corneal glycosaminoglycans (Dohlman, Wortman, and Hultman), 867
utilization in synthesis of mucopolysaccharides by retina (Hall, Ocumpaugh, and Young), 322
Sulfated polysaccharide, experimental retinal detachment with (Landholm and Watzke), 42
Surgery of anterior segment of eye (Barraquer, Troutman, and Rutllán) (B. rev.), 962
Sympathectomized rabbit eyes, normal and, effect of death on outflow resistance in (Bárány and Gassmann), 206
Sympathomimetic drugs, parasympathomimetic and, effect on secretion in vitro by ciliary processes of rabbit eye (Berggren), 91
Symposium on lens, 377
participants, 375
on vascular disorders of eye, 969
participants, 971
Synthesis, DNA, RNA, and protein, in developing lens, changes in (Hanna), 480

T

Target, 0.06 degree red, use for evaluation of foveal function (Potts and Nagaya), 303
TEM, x-rays, and Myleran, comparison of effects on lens epithelium (von Sallmann), 471
Tissue morphology, pericorneal, mast cell disruption and other changes in, after intraperitoneal injections of potent histamine liberator (compound 48/80) (Garden), 835
Topical corticosteroids and galactose cataracts (Cotlier and Becker), 806
intraocular pressure response to (Becker), 198
Transport, amino acid, in lens (Kinsey), 691
in lens in relation to sugar cataracts (Reddy), 700
Transport—Cont'd
cation, active, in lens, Na-K activated adenosinetriphosphatase and (Bonting), 723
of lens (Harris and Becker), 709
glucose, in lens, review of (Patterson), 667
mechanisms, discussion on, 739
electron microscopy of human corneal endothelium with reference to (Iwamoto and Smelser), 270
of sugars into lens (Kern), 680
Transscleral freezing of retina, experimental study (Archambeau and Henderson), 885
Trout, rainbow, in vitro ion and water movement in corneas of (Edelhauser, Hoffert, and Fromm), 290
Twitch fibers, slow and, in superior rectus muscle of rabbit, comparative pharmacologic-histologic study (Kern), 901

U

Uveitis, herpes simplex, experimental study with fluorescein-labeled antibody technique (Pettit et al.), 349

V

Vascular disorders, retinal, therapy of: effect of hyperbaric oxygenation on microcirculation (Haddad and Leopold), 1141
injection method and functional geometry of microcirculation (Sobin), 1105
patterns, retinal, acellular change (Kuwabara and Cogan), 1049
relationships, intertissue, in fundus of eye (Michaelson), 1004
Vertebrate eye, experimental embryology of (Coulombre), 411
Vertebrates, different, lens proteins during embryonic development of (Rabaey), 560
Vesicles, pinocytic, role in transport of materials across walls of small blood vessels (Marchesi), 1111

Vision, subnormal, management of patient with (Fonda) (B. rev.), 962
Visual evoked cortical response in cat (Jacobson, Masuda, and Jacobson), 330
response, studies on. I. Use of 0.06 degree red target for evaluation of foveal function (Potts and Nagaya), 303

W

Water movement, ion and, in vitro, in corneas of rainbow trout (Edelhauser, Hoffert, and Fromm), 290
Wound repair, lag phase, development of enzyme activities in corneal connective tissue cells during (Weimar and Haraguchi), 853

X

X-rays, Myleran, and TEM, comparison of effects on lens epithelium (von Sallmann), 471

Z

Zonular fibers, lens capsule and (Ashton et al.), 141
